

Strike Group, LLC SeaPort-e Subcontractor

Subcontractor Company Information	
Company Name and Address:	ChemicoMays, LLC 25200 Telegraph Road Suite 120 Southfield, MI 48034
Point of Contact Name, Phone Number and Email:	Chad Stackhouse (248) 723-3263 cstackhouse@chemicomays.com
Proposed Functional Area(s):	16) Logistics Support 17) Supply and Provisioning Support 18) Training Support 20) Program Support
Registered in SeaPort Website: https://auction.seaport.navy.mil/registration	
Subcontractor Agreement in Place with Strike Group, LLC:	
Reference #1	
Client Name and Address:	General Motors Corporation; Pontiac, MI
Point of Contact Name, Phone Number and Email:	Patricia Griffin (586) 899 1182 Patricia.griffin@gm.com
Contract Number:	SHB 123644
Period of Performance:	2007-Present
Contract Description:	<p>ChemicoMays provides hazardous material management (chemical management) for five GM facilities: Powertrain Baltimore, Spring Hill Manufacturing, Pontiac Powertrain Laboratories, Warren Technical Center, and San Luis Potosi Complex. Services for the Spring Hill facility include:</p> <ul style="list-style-type: none"> • Comprehensive procurement and inventory management designed to reduce on-site inventory, as well as the total number of different materials on-site; • Management of all chemical systems, including the use of statistical process control to monitor and control systems; • Continuous improvement of materials in-use with regard to cost effectiveness and health safety and environmental impact; • Training of chemical users with respect to proper chemical handling and use techniques; • Management of Material Safety Data Sheets; • Management of new material approval process; • Project Management for all chemical process changes and start-ups; • Assistance in resource management with respect to reduction of hazardous wastes, wastewater treatment, water and energy usage. <p>The program also provides for experience with In Surge Situations.</p>

	<p>Participation in production planning meetings prepares the program users for any increases and surges in requirements. The program is integrated with the customer's Inventory Management System (Kanban) with receipt of requisitions through EDI and automatic creation of a Kanban label. Integration allows for automatic payment on receipt, reducing work flow and payment issues.</p> <p>The Spring Hill Manufacturing facility includes an outside warehouse to provide Just-In-Time Inventory to the site. All materials entering the site are received in the outside warehouse, labeled with customer specified bar code, received in the customers system, and delivered to one of 15 use locations in the plant. Materials are shipped in individual units (not case lots) for inventory minimization on-site.</p>	
Similarity to Proposed Functional Area:	16) Logistics Support	Implemented acquisition logistics for the management of chemicals to support GM's manufacturing operations and facilities maintenance. Activities include forecasting, delivery, receiving, and technical application support.
	17) Supply and Provisioning Support	Procure, supply, deliver, and manage the inventories for over \$13M in chemicals.
	18) Training Support	Provided training in proper chemical handling and use of chemicals.
	20) Program Support	Provide a fully integrated management program addressing financial, environmental, and operational requirements that for overall cost savings to GM (over \$3.5M in past 5 years). Integrate multiple systems including purchasing, maintenance, and Environmental, Health, and Safety.

Reference #3		
Client Name and Address:	Amgen; Thousand Oaks, CA	
Point of Contact Name, Phone Number and Email:	Maritza Shaughnessy (805) 447-1298 maritzas@amgen.com	
Contract Number:	9351226 OS	
Period of Performance:	2007-2012	
Contract Description:	<p>ChemicoMays provided chemical program management for nine buildings at AMGEN's Thousand Oaks Research Center, as well as the San Francisco, CA and Cambridge, MA research facilities. The program for these facilities includes: chemical purchasing, receipt, registration, delivery to point of use, inventory management, waste consolidation, and environmental health & safety (EH&S) support. Scope of services for the involved locations include:</p> <ul style="list-style-type: none"> • Receipt of all chemicals entering the facility, including registration into the chemical management database, and assignment of material properties and application of inventory management bar code labels; • Delivery of materials to end-users at over 900 points of use (POU) across the Thousand Oaks site, and 100+ POU's at other locations; • Pickup of chemicals from POU's to return to stockroom, pickup of empty containers for registration and disposal; • Pickup of liquid and solid waste at POU. Consolidation of liquid and solid lab waste and transportation to on-site 90 day storage facility. Management of waste containers and labeling; • Management of standard items in multiple stockrooms. Users remove materials directly from stockrooms as required and scan barcodes with their user id's and locations when unattended. Attended stockrooms (pharmacies) are currently being piloted to improve inventory accuracy and eliminate the need for researcher scanning; • Procurement of all non-catalog (spot buy) chemicals for users and standard stock items for stockrooms; • Management of MSDS's including submission of all MSDS to on-line MSDS database; • Complete management of chemical inventory management system including user management and training. Management of computer and scanning hardware for inventory management; <p>Development and manning of Chemical HotLine to respond to user requests and issues.</p>	
Similarity to Proposed Functional Area:	16) Logistics Support	Implemented acquisition logistics for the management of chemicals to support Amgen's R&D laboratories. Activities include forecasting, delivery, management of re-use centers, receiving, and technical

		application support.
	17) Supply and Provisioning Support	Procure, supply, deliver, and manage the inventories for over \$5M/year in chemicals.
	18) Training Support	Provided training on processes and systems to improve researcher interface with the chemical management.
	20) Program Support	Provide a fully integrated management program addressing financial, environmental, and operational requirements that utilize onsite staff, centralized supply chain management, and multiple systems. Integrate multiple systems including purchasing, maintenance, and Environmental, Health, and Safety.
