# TOTAL INVENTORY *management*

**Henkel**

1

Electronically  
Scan Consumed  
Material at  
Point-of-Use

2

Automatically  
Process Scanned  
Materials

3

Replenish  
Stocking  
Locations

4

Central  
Purchasing –  
Analyze Inventory  
and Manage  
Supply

5

Central Inventory  
Delivery Logistics

6

Receive Stock,  
Record Lot  
Details and Apply  
Item Labels

## Supply Chain Management

- Quality control
- Centralized procurement and sourcing
- Product and supplier consolidation
- Customer catalogs

## Environmental Health and Safety

- MSDS management
- Enhanced environmental reporting
- Automated product approval process
- Waste minimization
- Customized solutions

## Point-of-Use Inventory Management

**Managed Inventory, Shelf Life and Lot Control (MISL™)**— Synchronize and manage all aspects of the chemical life cycle. This system is dedicated to managing chemicals and takes JIT delivery and lean operations to a new level. Henkel's closed loop methodology optimizes inventory levels and reduces waste while increasing productivity. Fully auditable centralized systems also allow us to customize and automate specific solutions for our clients.

## Henkel Chemical Management Benefits

- Reduced costs
- Improved productivity
- Streamlined environmental and regulatory compliance

Our Team will work with you to develop and customize a program that is economical, efficient and sustainable. For additional information on Henkel Chemical Management, please contact:
